

Come near

Love of my life – come in my light
Don't stay outside – locked up in yourself
Remember I've always held you

Look in my eyes – who do you see
Nobody here to fear, then why
Why do you live in a weird lonely world

I see you really want to be with me
Then come, come – step out of the dream
Don't stick to nonsense - you've saved a lot
Return everything you are not

Come – come near – leave it behind
Don't believe – your clever mind

Oh, go – beyond yourself – open and melt
Don't be a tourist in a beautiful place
Taste all the fruits of the truth – ripe or sad

I see you really want to be with me
Then come, come – step out of the dream
Don't stick to nonsense – you've saved a lot
Return everything you are not

Come – come near – leave it behind
Don't believe – what you feel – nor your mind

Love of my life – come in my light
Don't stay outside – locked up in yourself
Remember I've always held you

Look in my eyes – who do you see
Nobody here to fear, then why
Why do you live in a weird lonely world
