

**You are there**

When the sun breaks through  
And it's finally clear:  
The world is in pain  
You are there

When I'm totally through  
With people's games  
I admit the truth  
You are there

You are there  
Right here with me  
You are there  
And then I feel free

When the pills are gone  
And the Light is strong  
And the pain holds on  
You are there

The illusions are seen  
The American dream  
And the promise is dead  
You are there

You are there  
Right here with me  
You are there  
And then I feel free  
You are there  
Everywhere in me  
You are there  
When I cannot see

When the smile is far  
And the world needs to fight  
This simple fact  
You are there

When the burden is big  
It will disappear  
When I realize  
You are there

You are there  
Right here with me

Justin Heart – You are there

You are there  
You have always been  
You are there  
Everywhere in me  
You are there  
When I cannot see

When the lights go on  
And the show is done  
When reality dawns  
You are there

When the child needs to come  
And the womb is prepared  
And the world needs to kill  
You are there

You are there  
Right here in me  
You are there  
You have always been  
You are there  
Everywhere in me  
You are there  
When I cannot see

When the sun goes down  
And the evening falls  
And the night is long  
You are there

When the fake light died  
When it's finally clear:  
The world is just pain  
You are there
